Mono and binary Zinbiel algebras

Suleyman Demirel University, Kazakhstan

Abstract: The report will be devoted to mono and binary Zinbiel algebras. An algebra is said to be a mono Zinbiel algebra if each of its one-generated subalgebra is a Zinbiel algebra. An algebra is said to be a binary Zinbiel algebra if each of its two-generated subalgebras is a Zinbiel algebra. We give an independent set of defining identities for mono and binary Zinbiel algebras.
